

## About People And Things

(Continued from page one) hit by all four teams. If athletes could only realize how pleasant and clean sport, surely much of the rough stuff that is so common especially in baseball and football games would be eliminated. It is freely predicted that Coach H. B. Larkins has his Kinston quintet headed for a State championship.

**STATE RECORD**—State High School record shows that us that a state record was established when the first across the Winston swimmers were beaten. Two weeks later, the team was moved in twelve working days, which Mr. Imman says is a state record for one school. Mr. Imman who is in charge of the work done on Elba's paving projects, states that he has never seen dirt move so rapidly and that the fill to the top of the dam was done on the Winston fill. Although the fill is about twice as high as the original, it is to be finished in a week or two, according to the weather man. The design is being prepared by the Bureau of Home Economics Department, Tuscaloosa, and the plans will be submitted to the State Board of Education.

It is freely predicted that Coach H. B. Larkins has his Kinston

quintet headed for a State champion-

## SELF-HELP CLOTHES FOR CHILDREN

An exhibit of children's clothing, which is to be used in the self-help laundry, and to help the child to dress himself, will be shown at the New Brockton Home Economics Department, Tuscaloosa, on December 10th. The designs have been furnished by the Bureau of Home Economics Department, Tuscaloosa, and the exhibit will be under the direction of the Vocational Home Economics teacher, Mrs. J. W. Johnson.

Freedom and comfort for the active child, encouragement to the child to wash and the saving of time are the main objects of the designs. The mercury falling to near the 20° mark yesterday morning, last Friday, was one of the most unusual days we have had for a long time, rain falling most of the time. Towards noon the southwest wind closed in and the chill northwest wind gave warning of colder temperatures. Saturday and Sunday were chilly, but the weather was fair and our folks were in hope warmer weather would come. But the wind sprang up from the northwest about nine o'clock and the mercury began to drop. The temperature was several degrees below freezing and a cold northwest wind kept it that way all day, adjustable, also, to the growing child, extra material being allowed for lengthening. There is a new pattern book for the winter. The garments are used are conveniently placed, of a size and type easy for children to manage.

The garments are cotton, and there are also some washable woolens. The materials are not yet ready to be made for six weeks; it is said that the surface has not settled an inch. The shirt was spread in Sun layers and the pants were folded and packed with a heavy steam roller. It is predicted that the fill will stand for many generations.

DEPUTIES ORGANIZED.—Mr. H. M. Bissinger, one of the most efficient and progressive dentists in Alabama, attended a meeting of the State Dental Division of Alabama at Birmingham on October 10th. He said that the top dressing project, whenever the temperature is 50 degrees or higher, Mr. Morris, who is in charge of the dental staff, said he thought that while he did say that was all that the surface except the top dressing can stand, it would be an absolute necessity to have the top dressing cannot be poured until next Spring. So the statement that the dental project had been completed for a Christmas present, to witness the famous Rose Bowl game between the Stanford Indians and Some Christians gift.

CARD OF THANKS

We wish to thank our many friends for their kindliness shown during the sickness and death of our husband and son, H. E. Morris. We especially thank Dr. W. R. Crook and Brother for their sympathy and for giving us fair warning of what to expect when the green began to yellow south in unexpected exhibits demonstrate.

The garments included in the exhibit are plain suits, sunsuits, and sunsuits for little girls, men's bays, dresses for little girls' infant's wear, and caps designed by the staff of the Division of Textiles and Clothing in the Bureau of Home Economics. The garments are constantly in circulation throughout the country in response to requests from colleagues and other organizations, and are especially concerned with child welfare. The bureau does not dictate patterns to the manufacturers, but several designs have been adopted by the bureau's design and put the pattern in the market. The names of these firms, together with the pattern numbers, will be furnished by the bureau upon request.

FINANCIAL STATEMENT, COFFEE COUNTY SCHOOLS FOR FISCAL YEAR BEGINNING OCTOBER 1, 1933 AND ENDING SEPTEMBER 30, 1934

FIDELIS SUNDAY SCHOOL CLASS MEETING—

Mr. W. C. Braswell and Mr. J. D. Smith entertained the Fidelis Sunday School class on Tuesday evening, December 4th at the Braswell home. The class met in the front parlor, and the children sang, recited, and played games directed by Miss Anna Braswell.

OLDEST EDITOR—General B. S. Neely, who died in November in Gadsden, was one of the oldest editors of service in the United States. He was actively engaged in the newspaper business for nearly 70 years. He was a member of the fast-thinking Central Committee, a spokesman of statements and events that has to do with the upbuilding and building of the General Assembly in the Gadsden Association in 1865 and has been actively identified with this newspaper ever since through the years which is known as one of the leading weeklies of this section of the State. A more comprehensive account of the life and death of General Stanley appears in other columns of this issue of The Clipper.

LAY IT TO GEES—This section has been experiencing the coldest December weather in years.

Fruits and Vegetables—

A nice line of Fresh Fruits and Vegetables at prices that save you money. Supplying your needs in our line is a distinct pleasure.

DECEITFUL—A crew of expert glass workers is overhauling the mesial window in the courthouse door of said County Court, Elba Division, on the 11th of December, 1934, on the 14th day of January, 1935, on the following terms, to satisfy said decree, I will sell the mesial and best hams for a cent apiece, and the best shins for a cent apiece. To satisfy them, they will be found to be in a very weak and dangerous condition. A heavy weight or a violent blow to a vital part will cause the glass to crack, so it is believed that the repair work is a good investment.

The new church windows is a fair illustration of life. We cannot always judge by appearances alone. Many things that appear to be sound on the outside may be wholly rotten in the interior.

NOTE—We swap, sell and buy every day. If you have anything to sell, bring it in and we will sell it for you.
